

PRIVACY POLICY

Last updated July 02, 2026

This Privacy Notice for YAN WANG ("we," "us," or "our") describes how and why we might access, use, store, and share information when you use Notics, including the Notics iOS app, its widget extension, and notics.top (collectively, the "Services").

Notics is an iOS calendar and reminders app that combines Apple Calendar events and Reminders into a themed agenda experience with month navigation, search, item editing, optional local daily digest notifications, and WidgetKit widgets.

Questions or concerns? Reading this Privacy Notice will help you understand your privacy rights and choices. If you have questions, contact YAN WANG at lumora.studio@outlook.com or submit the privacy request form at <https://lumorstudio.feishu.cn/share/base/form/shrcnogpfl3PWcPM2J5rH4WAH3g>.

SUMMARY OF KEY POINTS

What personal information does Notics process? Notics accesses calendar events, reminders, app preferences, local-notification settings, and website language preferences only as needed to provide the Services. Calendar and reminder content can include information you enter into those systems, such as titles, notes, dates, alarms, completion status, list names, calendar names, and account/source names.

Does Notics send calendar or reminder data to us? No. The Notics app does not operate a backend service that receives your calendar or reminder data, and we do not sell that data. Calendar and reminder data may sync through Apple, Google, Microsoft, Exchange, or other account providers configured on your device under their own terms and privacy policies.

Do we use analytics, ads, tracking, or crash-reporting SDKs? No. The app does not include third-party analytics, advertising, tracking, or crash-reporting SDKs.

Do we process support messages? If you email us, use the contact page, or submit the privacy request form, we process the details you choose to send so we can respond, troubleshoot, improve Notics, prevent abuse, and keep necessary business records.

What are your rights? Depending on where you live, you may have rights to access, correct, delete, restrict, or object to certain processing of personal information. For app data stored by your calendar or reminder providers, contact those providers. For support communications or other information within our control, contact us using the details in this notice.

15. HOW CAN YOU REVIEW, UPDATE, OR DELETE DATA?
16. LEGAL NOTICE AND COPYRIGHT

1. WHAT INFORMATION DOES NOTICS ACCESS?

In Short: Notics accesses information on your device through Apple-provided frameworks only for the purposes described in this notice.

The app accesses only the on-device information listed below, through Apple-provided frameworks, and only for the stated purpose:

- Calendar events. Read and edited via EventKit from the iCloud, Google, Outlook, and Exchange accounts configured in iOS Settings. This can include event titles, dates, times, notes, alarms, calendar identifiers, calendar names, colors, and source/account names.
- Reminders. Read, completed, edited, deleted, and scheduled via EventKit from your reminder lists. This can include reminder titles, notes, due dates, completion state, alarms, list identifiers, list names, colors, and source/account names.
- App preferences. Language, theme, first-day-of-week, gesture, calendar visibility, default calendar, alert, agenda, and reminder preferences are stored in the app. A copy of app settings is mirrored to the shared app group so widgets can load the appearance, language, and calendar display values they need to match the app.
- Local notifications. The daily digest time, sound, range, and preview setting you choose. If previews are enabled, the local notification body may include upcoming item titles generated on your device.

- Website language preference. Your language choice on notics.top may be stored in your browser local storage so the site can reopen in the same language.

None of this app or website preference data is transmitted to us. Calendar and reminder data syncs only through the providers you already configured with iOS, never through Notics.

2. HOW DOES NOTICS USE THIS INFORMATION?

In Short: We use information accessed on your device solely to provide the app features you request.

- Show your month, agenda, and reminders as you navigate the app.
- Create, edit, complete, schedule, and delete events or reminders on your request.
- Deliver the daily digest as a local notification at the time you set.
- Render widgets that match your active theme and language preferences.
- Remember the website language in your browser if you use the language switcher.

3. DOES NOTICS SEND CALENDAR OR REMINDER DATA TO US?

In Short: No. Notics does not operate an app backend that receives your calendar or reminder content.

The app reads and writes the data that already lives on your device and in the accounts you configured with iOS. We never create an app account for you, never ask you to sign in, never send your calendar or reminder data to our servers, never include third-party analytics, advertising, tracking, or crash-reporting SDKs in the app, never track you across apps or websites, and never use your data to train any model.

If our practices change, we will update this notice and provide any required notice or choices before the change takes effect.

4. WHAT PERMISSIONS DOES NOTICS REQUEST?

In Short: Notics requests Calendar, Reminders, and Notification permissions for the app features described below.

Calendar full access

Required to display, create, edit, and delete calendar events. Notics reads from and writes to the accounts you configured in iOS Settings > Calendar > Accounts. Without this permission, the month grid and agenda cannot function.

Reminders full access

Required for the reminder inbox, agenda reminder rows, completion controls, and scheduling. Without it, reminder features are unavailable while calendar events still work.

Notifications

Required only for the optional daily digest. If denied, the rest of the app works normally - you simply will not receive the local summary alert.

You can review or withdraw permissions at any time in iOS Settings > Apps > Notices.

5. LOCAL NOTIFICATIONS AND DAILY DIGEST

The daily digest is a local notification scheduled by iOS at the time you choose. The timing, sound, range, and preview setting are stored on your device. If previews are enabled, the notification body may include upcoming item titles generated locally from your agenda. No information about your agenda is included in anything sent to us, because nothing is sent to us. Focus modes and iOS notification settings fully control delivery.

6. WIDGETS AND SHARED SETTINGS

The widget extension reads appearance, language, and calendar-color preferences from a shared app group so its colors and surfaces match the app. The current WidgetKit extension does not send widget data to us.

7. WEBSITE AND SUPPORT COMMUNICATIONS

In Short: The website is static and support messages are processed only when you choose to send them.

The Notices website is static. We do not use advertising trackers, analytics scripts, tracking pixels, or cookies. The language switcher may store a local preference in your browser. Our website host may process standard server or CDN request logs, such as IP address, user agent, requested URL, referrer, and timestamp, to deliver, operate, secure, and troubleshoot the site. We do not use those logs to track you across apps or websites.

If you email us at lumora.studio@outlook.com, use the contact page to open a pre-addressed email draft, or submit the privacy request form, we receive the contact details and message content you choose to send. That may include your name, email address, topic, screenshots, device details, or diagnostics you include. We use support communications to respond, troubleshoot, improve Notices, prevent abuse, and keep necessary business records. We do not sell support communications or share them for advertising.

Privacy request form: <https://lumorstudio.feishu.cn/share/base/form/shrcnogpfl3PWcPM2J5rH4WAH3g>

8. THIRD-PARTY SERVICES

Your calendar and reminder data may be processed by third-party providers such as Apple iCloud, Google, Microsoft Outlook, or your Exchange server, under their own privacy policies. Notices does not control those services and is not responsible for their data practices.

Apple processes App Store and TestFlight activity under Apple's own terms and privacy policy. If you install Notices through TestFlight or the App Store and choose to share diagnostics with Apple, Apple may make crash logs or diagnostic information available to us, such as app version, device model, OS version, crash time, and stack traces. We use Apple-provided diagnostics only to diagnose, fix, and improve Notices. Your email provider and form provider process messages you send to us under their own terms and privacy policies.

9. HOW LONG DO WE KEEP INFORMATION?

Because we do not receive or store your app data, there is no app account, calendar, reminder, analytics, advertising, or tracking data for us to retain or delete on a server. Your calendar and reminder data is retained by your providers according to their own policies. Your app preferences remain on your device until you change them, clear app data, or uninstall the app. The website language preference remains in your browser until you clear site data.

Support messages may remain in our email records and backups as needed for the purposes above, unless you ask us to delete them and we no longer need to keep them for legal, security, or legitimate business reasons.

10. CHILDREN'S PRIVACY

Notices is not directed at children under 13, and we do not knowingly collect personal information from children. If a parent or guardian believes a child has sent us personal information in a support email, contact us and we will delete it when legally permitted.

11. WHAT ARE YOUR PRIVACY RIGHTS?

Depending on where you live, you may have rights to access, correct, delete, restrict, or object to certain processing of personal information. Most app data-rights requests, such as access, correction, or deletion of calendar and reminder data, should be directed to the providers that hold your calendar and reminder accounts. For support communications or anything else within our control, email lumora.studio@outlook.com or submit the privacy request form, and we will respond in accordance with applicable law.

12. CONTROLS FOR DO-NOT-TRACK FEATURES

Most web browsers and some mobile operating systems and mobile applications include a Do-Not-Track ("DNT") feature or setting. Because notices.top does not track browsing activity across apps or websites, the site does not respond differently to browser DNT signals.

13. DO WE MAKE UPDATES TO THIS NOTICE?

We may update this Privacy Notice from time to time. The updated version will be indicated by an updated "Last updated" date and will be effective as soon as it is accessible. If we make material changes, we may notify you by prominently posting a notice or otherwise communicating through the App or this site.

14. HOW CAN YOU CONTACT US ABOUT THIS NOTICE?

If you have questions or comments about this notice, contact:

- Responsible party: YAN WANG
- Email: lumora.studio@outlook.com
- Privacy request form: <https://lumorstudio.feishu.cn/share/base/form/shrcnogpfl3PWcPM2J5rH4WAH3g>
- Website: <https://notics.top/privacy.html>

15. HOW CAN YOU REVIEW, UPDATE, OR DELETE DATA?

For app data stored by your calendar or reminder providers, use those providers' tools or account controls. For app preferences stored locally, change settings in Notics, clear app data, or uninstall the app. For support communications or privacy requests within our control, email lumora.studio@outlook.com or submit the privacy request form.

16. LEGAL NOTICE AND COPYRIGHT

This Privacy Policy is the official public privacy notice for Notics as of the Last updated date above. Copyright (c) 2026 YAN WANG. All rights reserved. This document and its original expression are protected by copyright and other applicable laws. Users may download, retain, print, and share unmodified copies for personal, legal, and compliance reference. Unauthorized alteration, misrepresentation, or publication of a modified copy as the official Notics Privacy Policy is prohibited.
